That is not a “New” Significant Event and has a separate reporting path. I believe Althea and Ronnie are handling that. I have received some updates on the Incident with from the EPA R6 group handling that incident, but am not involved with the Gold King Mine Incident. Our procedure is to distribute the base report before 0800. I have not received any direction to include the Gold King Mine Incident on the Ops Report as it is reported separately. I thought they were handling reporting as they were the most knowledgeable.

Ronnie??
